

I urge the FCC to reject the National Association of Broadcasters' proposal (petition 04-160). I love listening to XM radio in the car (the 40's music and the 50s music stations are unique!), and when driving to Florida or New England, we need the weather and traffic stations for major metro areas. I don't understand why XM's providing this service should be made ILLEGAL! It sounds like some broadcasters just don't want to compete fairly. Respectfully, Judy Droitcour
